

DATA SHEET

FortiVoice Unified Communications

Real-time collaboration for optimal business efficiency

With a growing remote, home-based workforce, employees need easy access to a reliable business communications solution that empowers them to collaborate efficiently and reduce business disruption, wherever they are located and whatever devices they use.

FortiVoice Unified Communications simplifies and streamlines modern communications, creating a single digital environment where employees have everything they need to connect and work with one another, as well as engage with their customers.

Secure, modern communications

Recognized as a global cybersecurity leader by Gartner and other industry analysts, Fortinet understands the top priorities for business communications: reliability, security, flexibility, and value. FortiVoice Unified Communications provides secure conversations with integrated calling, conferencing, fax, and mobility to boost productivity.

Easy deployment and management

Managing business communications has become increasingly complicated as companies are more geographically distributed and employees are now homeworking. FortiVoice's simple licensing and intuitive interface helps to optimize administrators' onboarding experience to reduce business disruption.

Unified user experience

FortiVoice Unified Communications enables users to make and receive calls, check voicemails, access directories, and more directly from their computers and smartphones. With the Unified Communications Services enabled, users can enjoy additional features to view colleagues' real-time presences, start a chat, and receive faxes within the FortiFone Softclient.

Highlights

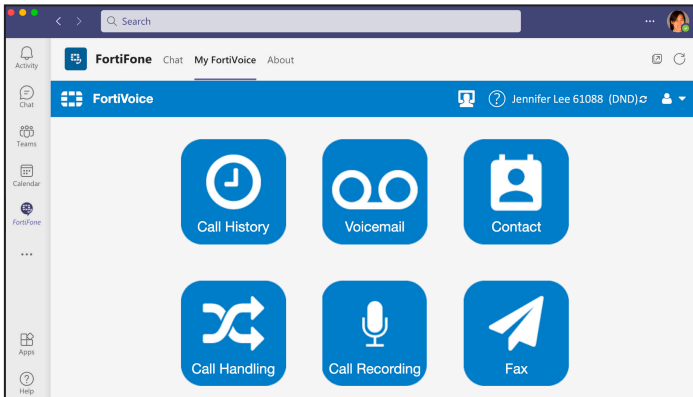

- Turn your smartphone and computer to a communication hub with integrated calling, conferencing, chat, fax, and more
- Easily view colleagues' real-time presences
- Quick chat anytime with colleagues from Softclient
- Send and receive faxes from FortiFone Softclient for Desktop
- Microsoft Teams integrations to enjoy quality FortiVoice calling experience within the app

KEY FEATURES AND BENEFITS

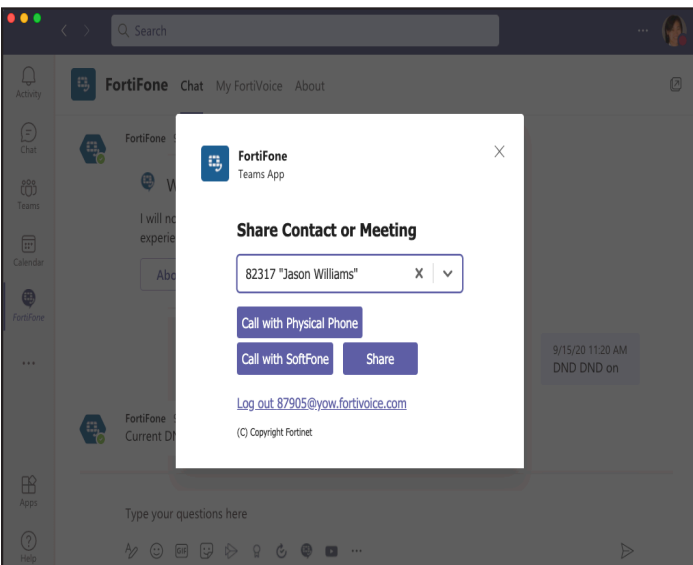

Unified communications	Increases employee productivity with integrated voice, conferencing, chat, fax, and more
Easy-to-use interface	Optimizes user experiences with an intuitive, modern design for streamlined navigation
Secure and quality calling	Prevents call eavesdropping and SIP attacks with built-in security and encryption
Real-time presence	Shows colleagues' availability in real time
Internet fax	Sends, receives, and views faxes without a fax machine
Microsoft Teams integrations	Allows for secure and quality calling without leaving the Microsoft Teams app

Microsoft Teams Integrations

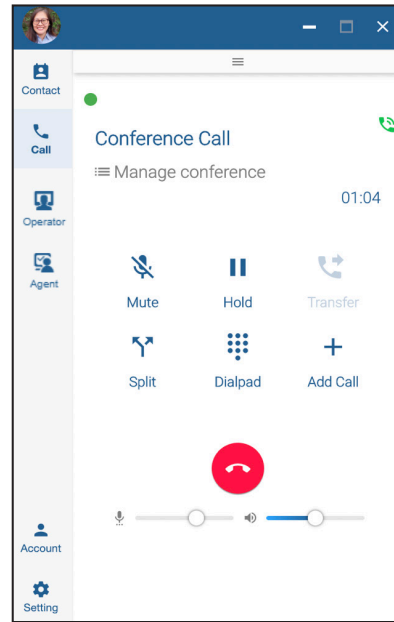

The FortiVoice Unified Communications solution is fully integrated with Microsoft Teams. Users can easily make calls and enjoy secure, quality conversations right within Teams. Launching the FortiFone Softclient directly from Teams opens up more options, such as accessing voicemails, checking faxes, and viewing call histories.

Quick access to your FortiVoice portal and manage your call preferences without leaving Microsoft Teams

Search colleagues, and call your contacts directly within Microsoft Teams with your preferred FortiFone device or app

Easily launch FortiFone Softclient for Desktop to enjoy your secure and reliable calling experience

ORDER INFORMATION

Include Unified Communications Services add-on licenses and turn your FortiVoice into a feature-rich communication solution that enables efficient collaboration among users regardless of their locations and devices.
